The Fund's objectives, risks, and charges and expenses must be considered carefully before investing. The statutory and summary prospectuses contain this and other information about the Fund and may be obtained by calling 1-800-366-3863. Please read carefully before investing.

Mutual fund investing involves risk. Principal loss is possible. Small-capitalization companies tend to have limited liquidity and greater price volatility than large-capitalization companies. Investments by the Fund in lower-rated and non-rated securities present a greater risk of loss to principal and interest than higher-rated securities. Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities.

The "Benchmark" is a weighted average comprised of 60% Russell 3000 Value Index / 30% ICE BAML 1-3yr BB Cash Pay High Yield Index / 10% ICE BAML 3-month T-Bill Index (rebalanced monthly). The Russell 3000 Value Index is a capitalization-weighted index composed of those companies that are among the largest 3000 US-incorporated equities by market capitalization that exhibit value characteristics such as lower price-to-book ratios and lower expected growth rates. This index is a total return market index, which assumes that all cash distributions are reinvested, in addition to tracking the price movements. The ICE BAML 1-3 year BB Cash Pay High Yield Index, a subset of ICE BAML U.S. Cash Pay High Yield Index, consists of all securities rated BB- through BB+ by S&P with a remaining term to final maturity of 3 years or less. The ICE BAML U.S. 3-month T-Bill Index reflects the performance of purchasing a single T-Bill issue at the beginning of the month and holding it for a full month. Lipper Flexible Fund Index, as defined by Lipper Inc., is composed of funds that allocate investments across various asset classes, with a focus on total return. You cannot invest directly in an index.

While the Fund is no-load, fees and expenses apply.

How \$10,000 Invested on 7/1/83 Would Have Grown

Figures include changes in principal value, reinvested dividends and capital gains distributions. Past expense limitations increased the Fund's return. This chart illustrates the performance of a hypothetical \$10,000 investment made in the Fund since inception through December 31, 2021. The total value of \$313,851 assumes the reinvestment of dividends and capital gains. This chart does not imply any future performance.
